

## RVS Master™ Injector Cleaner

### Application Instructions

- RVS Master™ Injector Cleaner specifically formulated for the treatment of fuel pumps & injectors of petrol engines. In addition to cleaning out your dirty injectors from gunk build-up and improving atomization of the air/fuel mixture, RVS Master™ also creates a durable nano-ceramic layer on all metal parts under friction, extending the life of your Fuel Pump and Injectors.

- One RVS Master™ Treatment lasts for 60,000km/40,000miles or 1,500 hours of operation. Under severe operating conditions, RVS treatment may be repeated sooner.

**Note:** Do not skip any of the steps in the following procedure. Doing so can significantly diminish your results.

#### Treatment Procedure

- 

1 Start the treatment with your fuel tank between 1/3 and 1/2 full
- 

2 Shake Bottle well until there is no more residue on bottom of bottle
- 

3 Remove gas cap and pour the entire contents of the bottle into your gas tank. Use a funnel if necessary.
- 

4 Start your vehicle right away and let it idle for 15-20 minutes without driving it.
- 

5 You can now drive your car normally at your own time. After you drive it for 400km/250 miles OR after 10 hours or running time, the treatment will be complete.  
**NOTE: Do not fill your tank** again until your tank gets empty first. Doing so will dilute the RVS compound and the results will be diminished.

#### Storage and safety instructions

Store at temperatures below +40 °C (105 °F). In case of skin contact, wash with lukewarm water and soap. If the product gets in your eyes, it may cause irritation – flush with water and consult a doctor if the irritation continues. If the product is swallowed, flush the mouth with water and consult a doctor. Do not induce vomiting! Keep product out of reach of children.
